# The Bay Area Ophthalmology Course at Stanford University

For Residents in Training and Practicing Ophthalmologists

**COURSE DIRECTOR: Dr. Steve Sanislo and Dr. Wen-Shin Lee**

The Bay Area Ophthalmology Course (formerly the Basic Science Course in Ophthalmology) has been offered to the vision community since 1970, presented by faculty from the four area teaching programs and recognized experts from other institutions. The course offers intensive instruction in the fundamental sciences underlying ophthalmic practice and research, including ophthalmic pathology, optics, epidemiology, genetics, immunology, pharmacology, orbit and oculoplastics, neuro-ophthalmology, corneal and refractive surgery, cataract surgery, glaucoma, pediatric ophthalmology and strabismus, and retinal surgery. Laboratory sessions are offered in pathology, optics, and phacoemulsification. Approximately seven and a half hours of instruction are offered each day, with corresponding handouts. Several evening receptions are included. The BAOC provides a strong and practical basis for residents in ophthalmology, vision scientists, and a review and update for practicing ophthalmologists. Foreign participants at every level of training are most welcome to attend.

WEEK	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY
<b>WEEK 1</b>	JUNE 26 ANAT/PATH + LAB	JUNE 27 ANAT/PATH + LAB	JUNE 28 OPTICS + LAB	JUNE 29 OPTICS + LAB	JUNE 30 OPTICS + LAB	
<b>WEEK 2</b>	JULY 3 RETINA + LAB	JULY 4 UNIVERSITY HOLIDAY	JULY 5 RETINA   GLAUCOMA + LAB	JULY 6 GLAUCOMA + LAB	JULY 7 PHACO + LAB

<b>WEEK 4</b>	JULY 17 UVEITIS	JULY 18 UVEITIS	JULY 19 INNOVATION	JULY 20 OCULOPLASTICS	JULY 21 OCULOPLASTICS	JULY 22 OCULOPLASTICS LAB (TBD)
<b>WEEK 5</b>	JULY 24 CORNEA	JULY 25 CORNEA				

# **Stanford Neuro-Ophthalmology Course**

## **For Neurologists and General Practitioners**

Neuro-ophthalmology is a subspecialty that deals with vision loss, double vision, pupil abnormality, and other issues that arise from diseases of the eye-brain pathway. Common diseases that affect the eye-brain pathway include multiple sclerosis, stroke, tumors, cranial nerve palsies, diplopia, myasthenia, and functional abnormalities. The course is composed of short lectures followed by practical cases and discussions. Our focus is on common issues and discussion of diagnostic approach and treatment that are highly relevant to clinical practice.

In this two-day comprehensive course, you will learn basics of the visual pathway, eye movement control, and pupil responses. Diseases covered include neuro-ophthalmic emergencies, optic neuritis/multiple sclerosis; visual field loss due to stroke, tumor, vascular malformations, and other conditions; diplopia due to cranial nerve 3, 4, and 6 diseases, myasthenia gravis, functional abnormalities, and other important topics. You will also learn basics of optical coherence tomography (OCT) and angiography, visual field testing, electrophysiology, and visual function assessment. There will be discussion of the latest developments in these technologies.

**Dates: Thursday, July 13 and Friday, July 14**

Registration will open on Feb. 10, 2023!

Early Bird Pricing is valid through April 1, 2023

## Early Registration Pricing

Early Registration Pricing is valid until April 1, 2023. After which, prices will return to its regular amount.

Pricing *does not* include housing.

**\$3,000**

**IN-PERSON (FULL)**

**\$1,600**

**VIRTUAL (FULL)**

**\$200**

**NEURO-OPTH ONLY**

## Regular Registration Pricing

Registration will be open until June 19, 2023.

Pricing *does not* include housing.

**\$3,750**

**IN-PERSON (FULL)**

**\$2,000**

**VIRTUAL (FULL)**

**\$250**

**NEURO-OPTH ONLY**

Last Day to register is on June 19, 2023 (5PM PST)

**REGISTER NOW!**

## Housing Information

**Housing Package: 31-nights \$6070**

**Check-In: June 25 , 2022**

**Check-Out: July 26, 2022**

BAOC has reserved a block of rooms. These are shared multi-unit apartments with a private bedroom, full-sized bed, and private bathroom. Shared common area and kitchen.

Executive Service: Executive service includes a seven-day housekeeping service (including holidays) and upgraded linens. Each room (prepared prior to guests' arrival) will include upgraded bedspreads, sheets, blankets, pillows, pillowcases, complete sets of towels and bathmats, and daily linen service. Room amenities also include soap and cups that will be replenished as needed.

Kitchen appliances: fridge, microwave, stove/oven, and garbage disposal. Housekeeping staff will make up the beds, empty the trash, dust, and vacuum the apartments daily. Internet included.

Munger is an adult residence.

Accommodations do not include: Television, dishes, utensils, cooking supplies, cleaning supplies, or decorative items.

Only those registered in the Bay Area Ophthalmology Course can reserve housing at Munger Graduate Residence.

**NOTE: Housing availability is first-come-first serve.**

Housing Payment: The BAOE Program Managers will provide you with an invoice via Stripe. You can pay this invoice via credit card, debit card, or wire transfer.

**Housing Refund:**

**There is no refund or early departure credit.**

*NOTE: Housing availability is first-come-first serve. Credit cards and cash are not accepted for housing.*

*Housing interest will be noted when you register and an invoice will be sent with instructions on payment.*

*We require checks to be sent via certified mail, or they must have a tracking number.*

*Additional housing information can be found in our BAOE website.*
